Water Port Identifier Codes

" Number of Characters:	Three
Type of Characters:	Alphanumeric
Data Location	
TCMD - DD Form 1384	Block 6 and 7, Columns 36b and 37
- Automated Record:	rp 21-23, 24-26
Responsible Agency:	Military Sealift Command

1. **General**. These codes identify water ports worldwide. The code representing the actual WPOE and WPOD is used on all DTS documentation for water shipments.

2. **Code Structure**. The water port codes are based on the geographic location of the port. The letters used in the first two positions of the three position code are generally assigned in alphabetic order, following the coastline. The first position of the three position code represents the major geographic area in which the port is located. These geographic areas are described in detail in paragraph 3., below. The second position in the code represents a subarea within the major geographic area. The third position in the code represents the specific port, port area, or island within the subarea.

3. **Major Geographic Areas**. The following list identifies the major geographic regions of the world and the code associated with each. This code is the first position of the water port identifier code and should assist in locating the specific port code in paragraph 4., below.
